£900.20

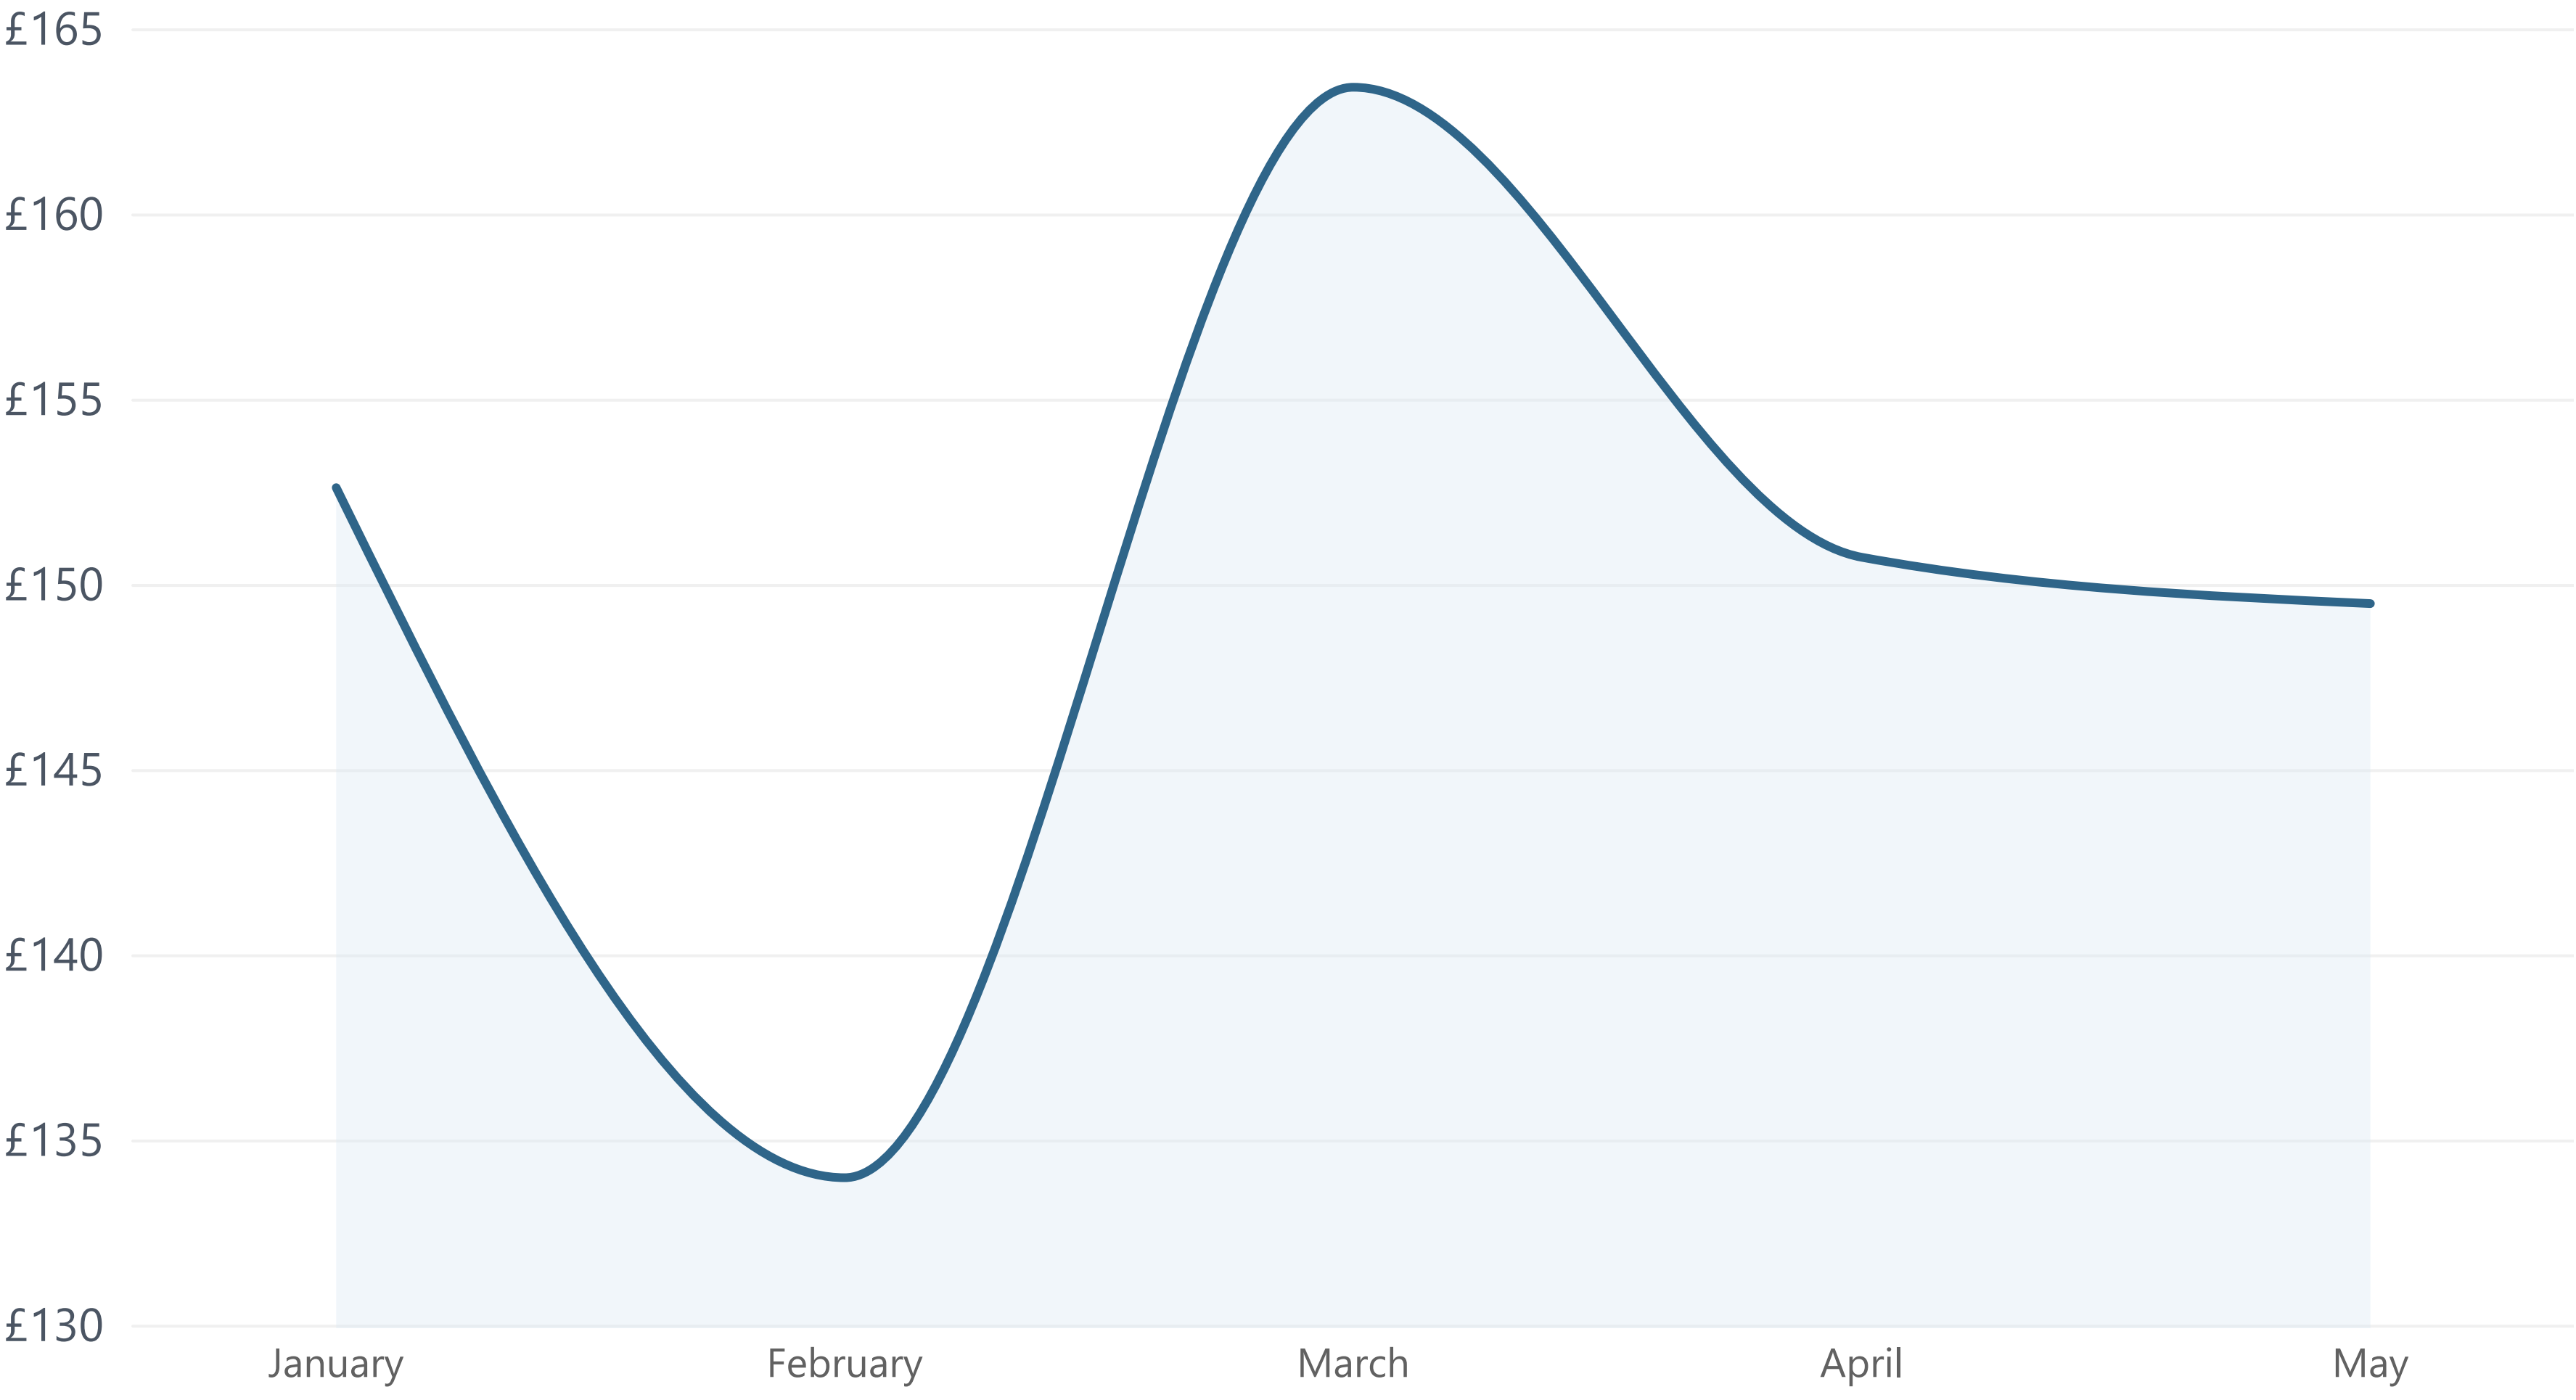

Transaction Value Trend

Monthly transaction value from January to May 2026

Total Fee Revenue by Month

Monthly fee revenue from January to May 2026

Key Takeaways

1

April marked the lowest transaction value, followed by a rebound in May.

2

Fee revenue dipped in February before reaching its Jan–May peak in March.

3

April had the lowest transaction value, but fee revenue remained near its typical monthly level.

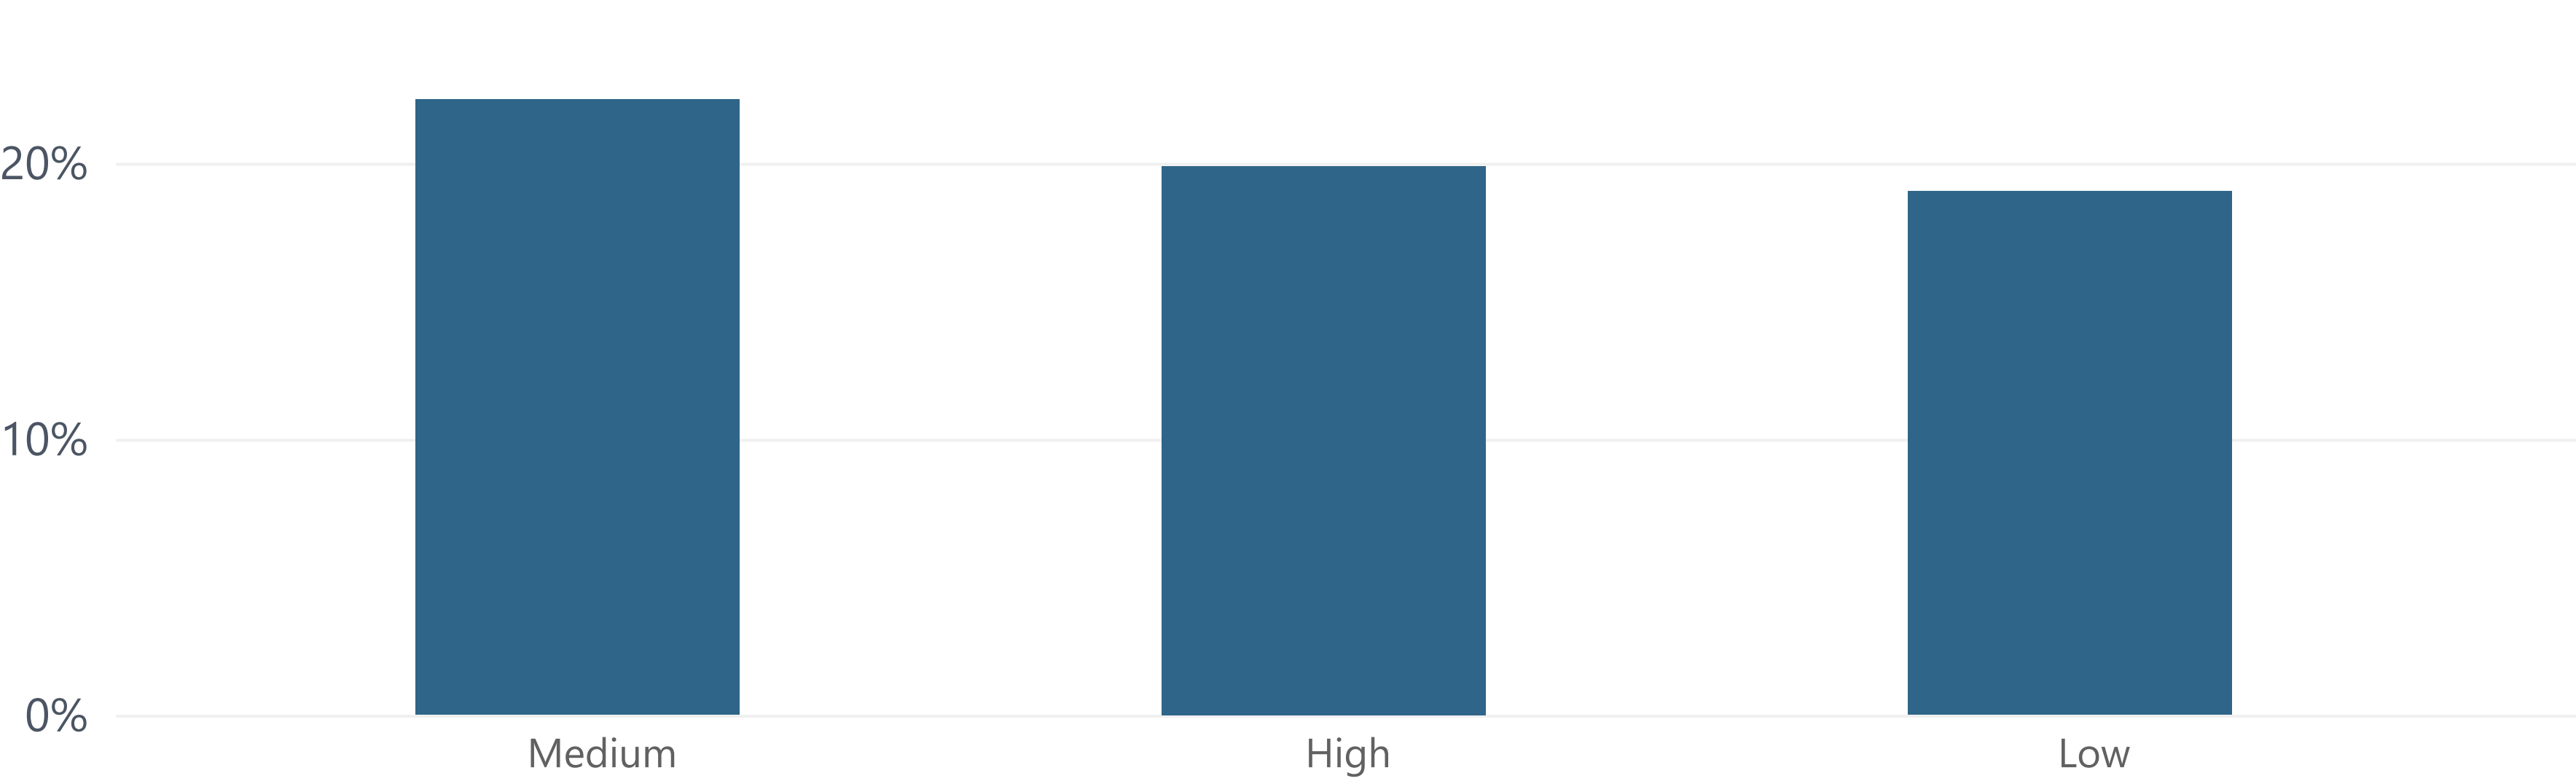

Customer Fraud Exposure

Transaction activity and fraud concentration by customer

Customer Name▲	Transactions	Fraud Transactions	Fraud Rate	Total Transaction Value	£12K+ Transactions
Aisha Kamara	75			£3,740.91	
Amelia Rhodes	75			£2,441.43	
Benjamin Fox	75			£93,446.97

Total	1500	300	20.00%	£1,897,267.75	75

Fraud Rate by Merchant Risk Flag

Observed fraud rate across merchant risk classifications

KYC Risk Summary

Transaction outcomes by KYC verification status

KYC Verified▼	Transaction Count	Fraud Transaction Count	Fraud Rate	Declined Rate
True	1200	300	25.00%	37.50%
False	300			25.00%
Total	1500	300	20.00%	35.00%

Key Takeaways

1

All 300 fraud-flagged transactions came from 4 customers and each had a 100% observed fraud rate.

2

Every transaction of £12,000 or more belonged to Rajan Mehta, and all were fraud flagged.

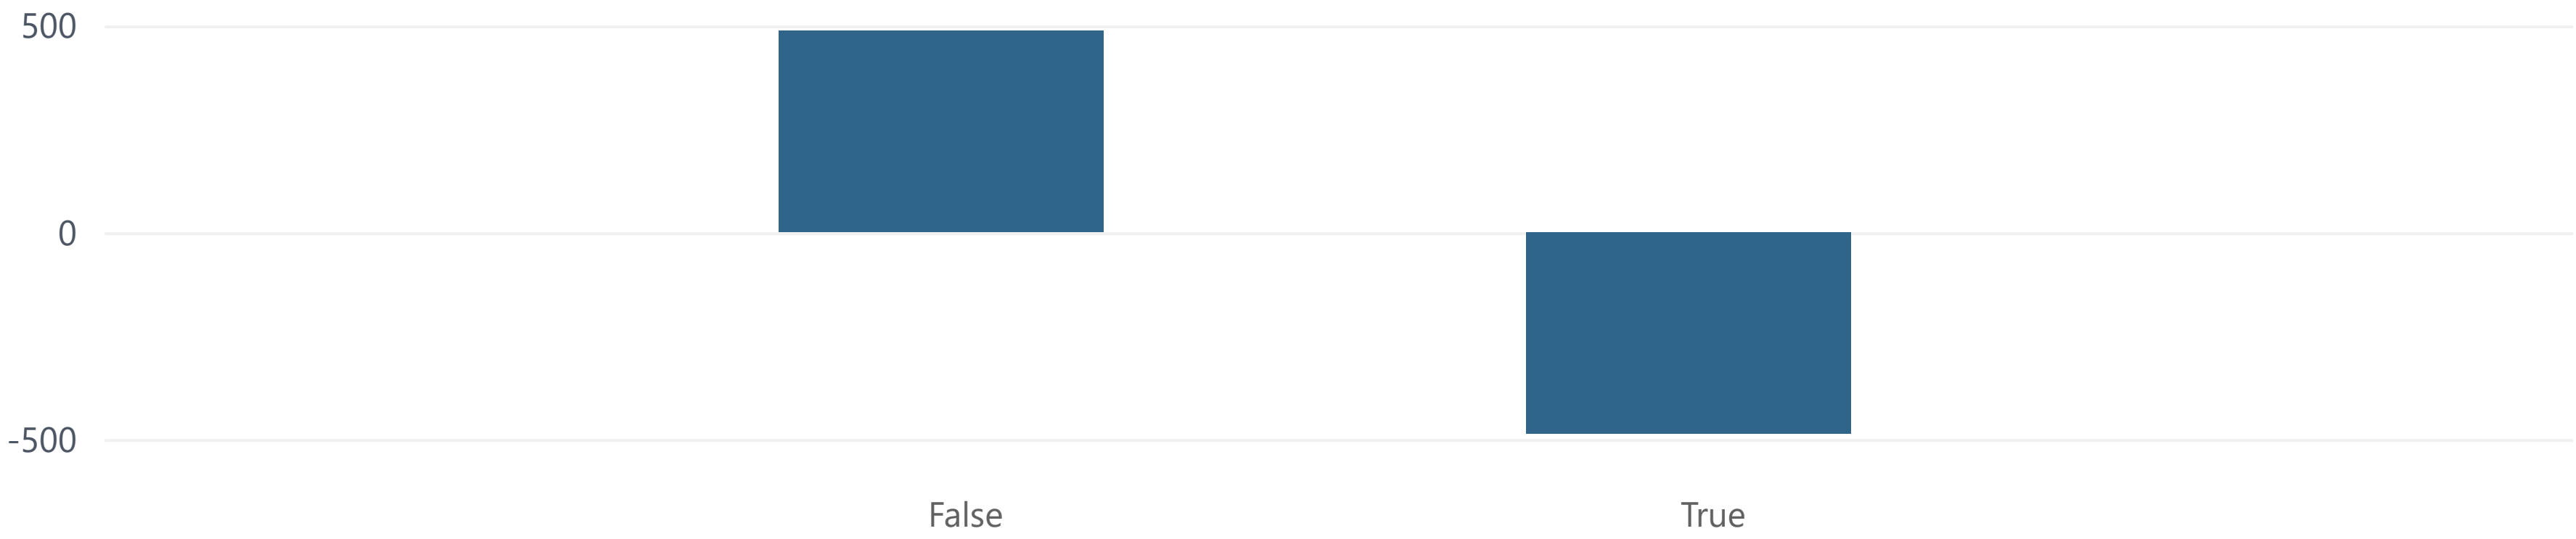

3

Medium-risk merchants have the highest fraud rate at 22.3%, versus 19.88% for High and 18.97% for Low.

Note: Positive = charged below typical fee; Negative = charged above typical fee.

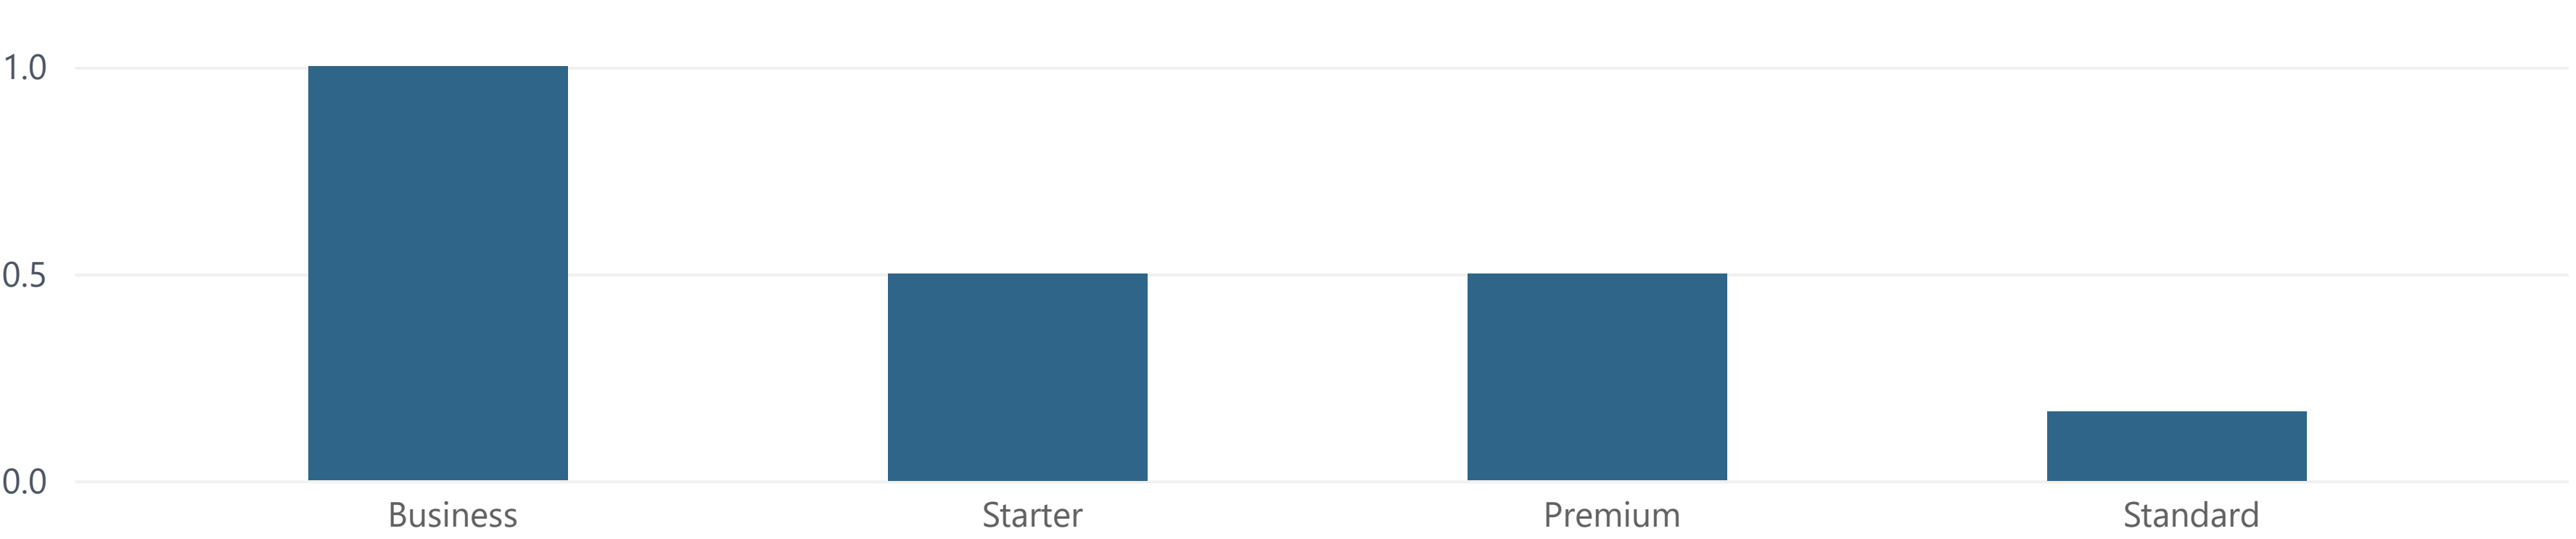

Fee Deviation by Transaction Market

Difference between typical and charged fees for domestic vs. international transactions

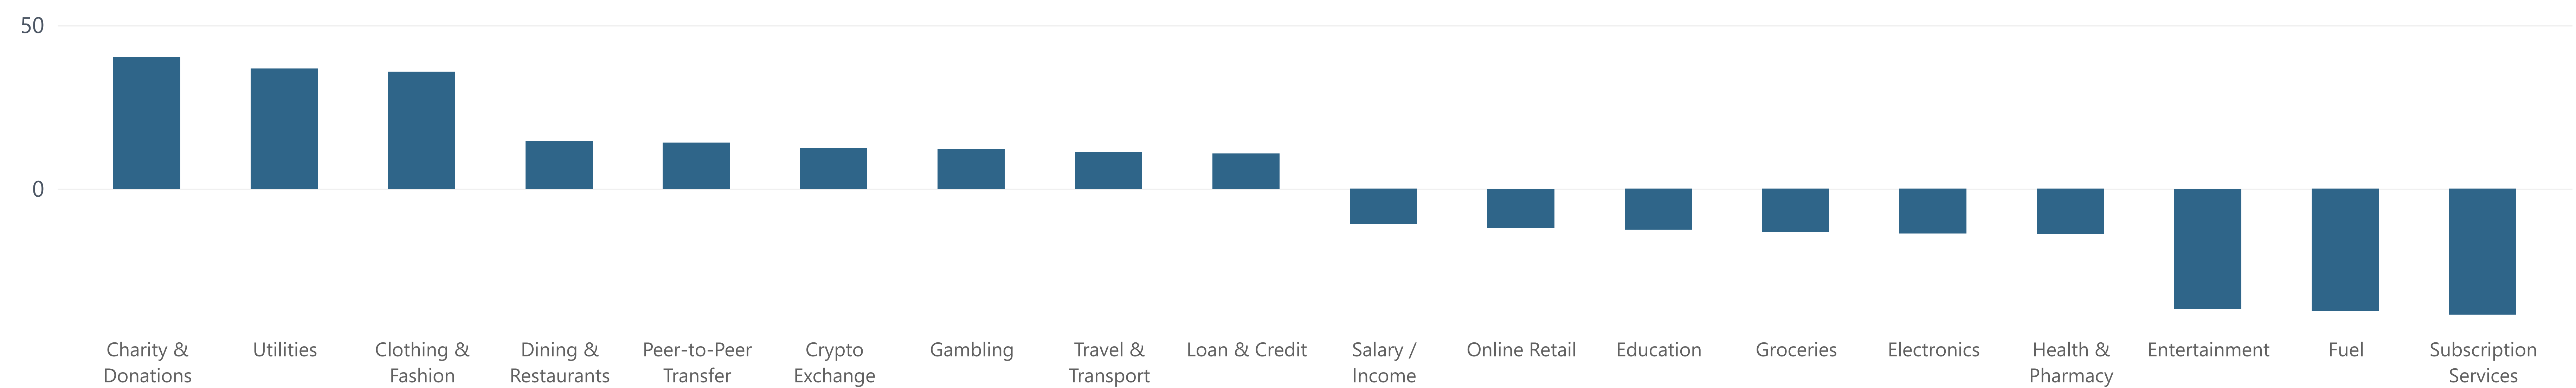

Fee Revenue per Transaction by Customer Segment

Average fee revenue generated per transaction across customer segments

Fee Deviation by Merchant Category

Categories contributing most to differences between typical and charged fees

Key Takeaways

1

International transactions were charged a net £487.11 below typical fees, while domestic transactions were charged a net £487.00 above typical fees.

2

Below-typical charges are most concentrated in Charity & Donations, Utilities, and Clothing & Fashion.

3

Business transactions average about £1.00 in fee revenue, compared with roughly £0.50 for Starter and Premium and £0.17 for Standard.

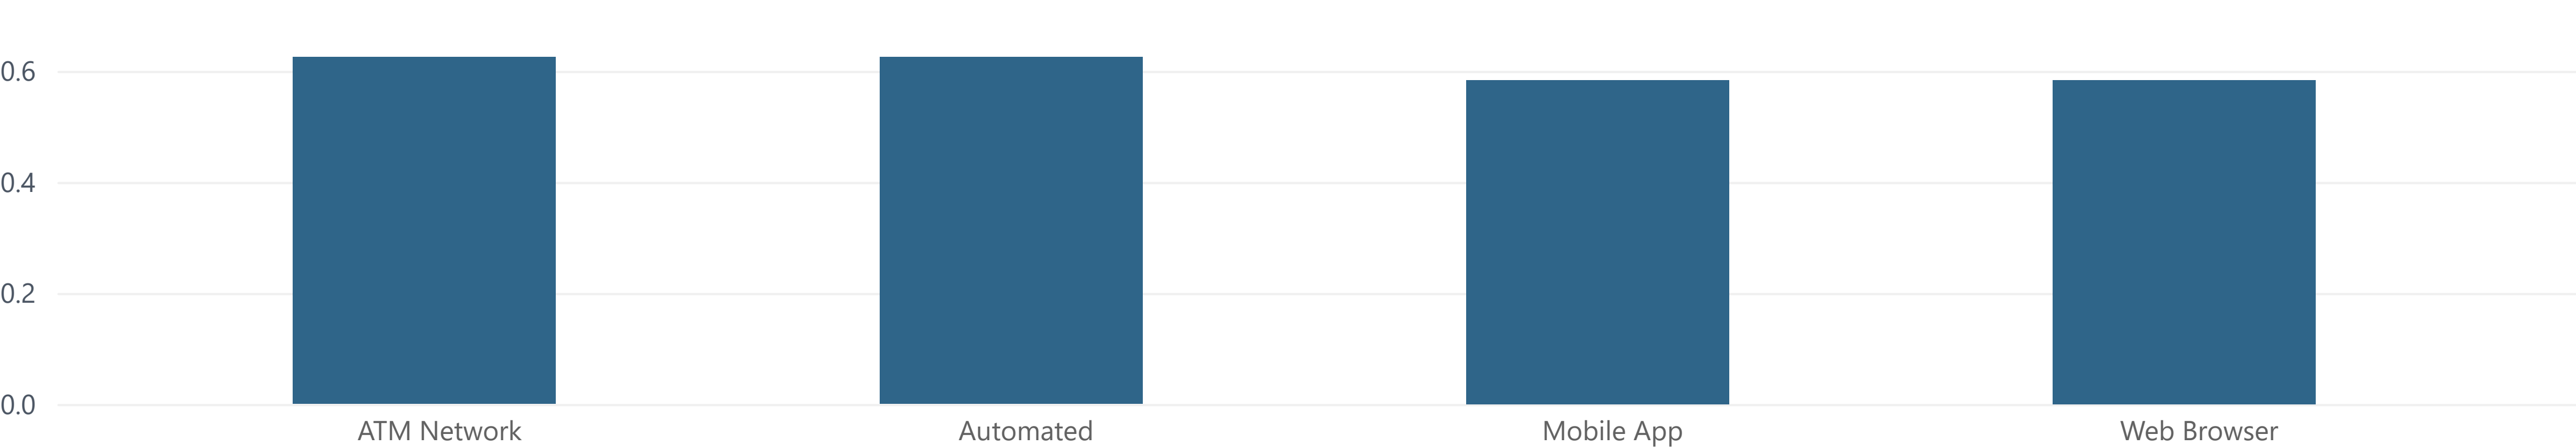

Transaction Status by Device

Distribution of transaction outcomes across recorded device types

Transaction Status	Android	iOS	Web	Total
Completed		225		225
Declined	375	150		525
Pending		375		375
Reversed			375	375
Total	375	375	375	1500

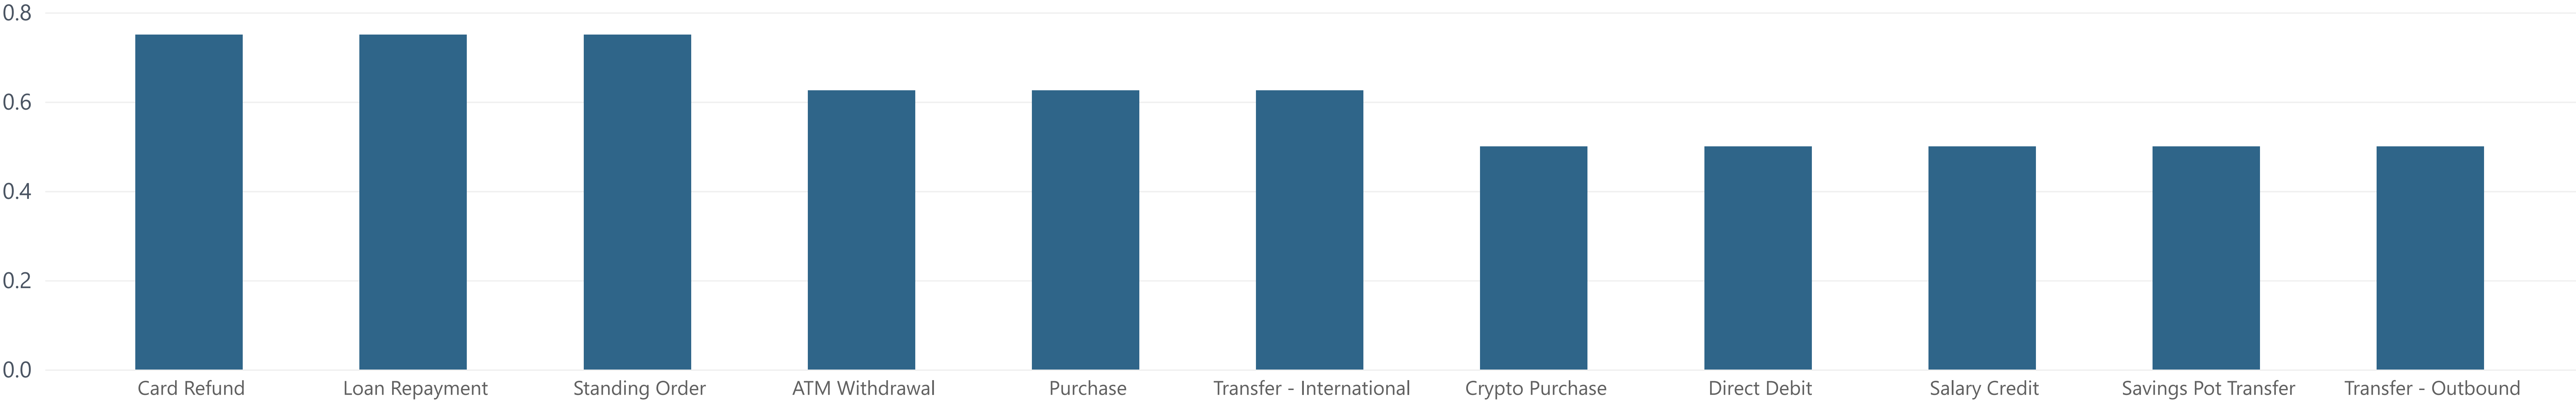

Failure Rate by Channel

Declined and reversed transactions as a share of channel activity

Failure Rate by Transaction Type

Transaction types with the highest rates of declined or reversed activity

Key Takeaways

1

Android is entirely Pending, Web entirely Reversed, and blank device values entirely Declined.

2

Failure rates are approximately 58–63% across channels, so no individual channel clearly explains the high failure activity.

3

Card Refund, Loan Repayment, and Standing Order reach 75%, compared with 50–62.5% for the others.
